BRICS PREPARATORY ROUND

Dear Parents (Grades I - XII),

Greetings !

This is to inform you that the school has registered for BRICSMATH.COM an annual online competition being organized in Mathematics, for students of Grades I-XII in BRICS countries (Brazil, Russia, India, China, and South Africa).

The goal of the competition is to develop creativity among children and to motivate them towards learning. The tasks are given in the form of a game which makes the learning process more interesting and effective. The competition focuses on logical thinking and does not require any in-depth knowledge of school curriculum.

Please refer to the link - <https://in.bricsmath.com/> for log in.

The login Ids of all students have been provided by the teachers. The login ids of students will also be available on ERP under 'homework 'section for Mathematics.

The preparatory round for the competition is open till Sunday, May 30, 2021. Students can do the practice as per their convenience.

We would request you all to please encourage your child to attempt the questions in the preparatory round. The results of the preparation round do not affect the results of the competition. The trial round and main round will be conducted in the Autumn 2021.

Wishing our children enjoyable Mathematics sessions.

Regards
Team RVS
