Biodiversity Park-A Virtual Tour

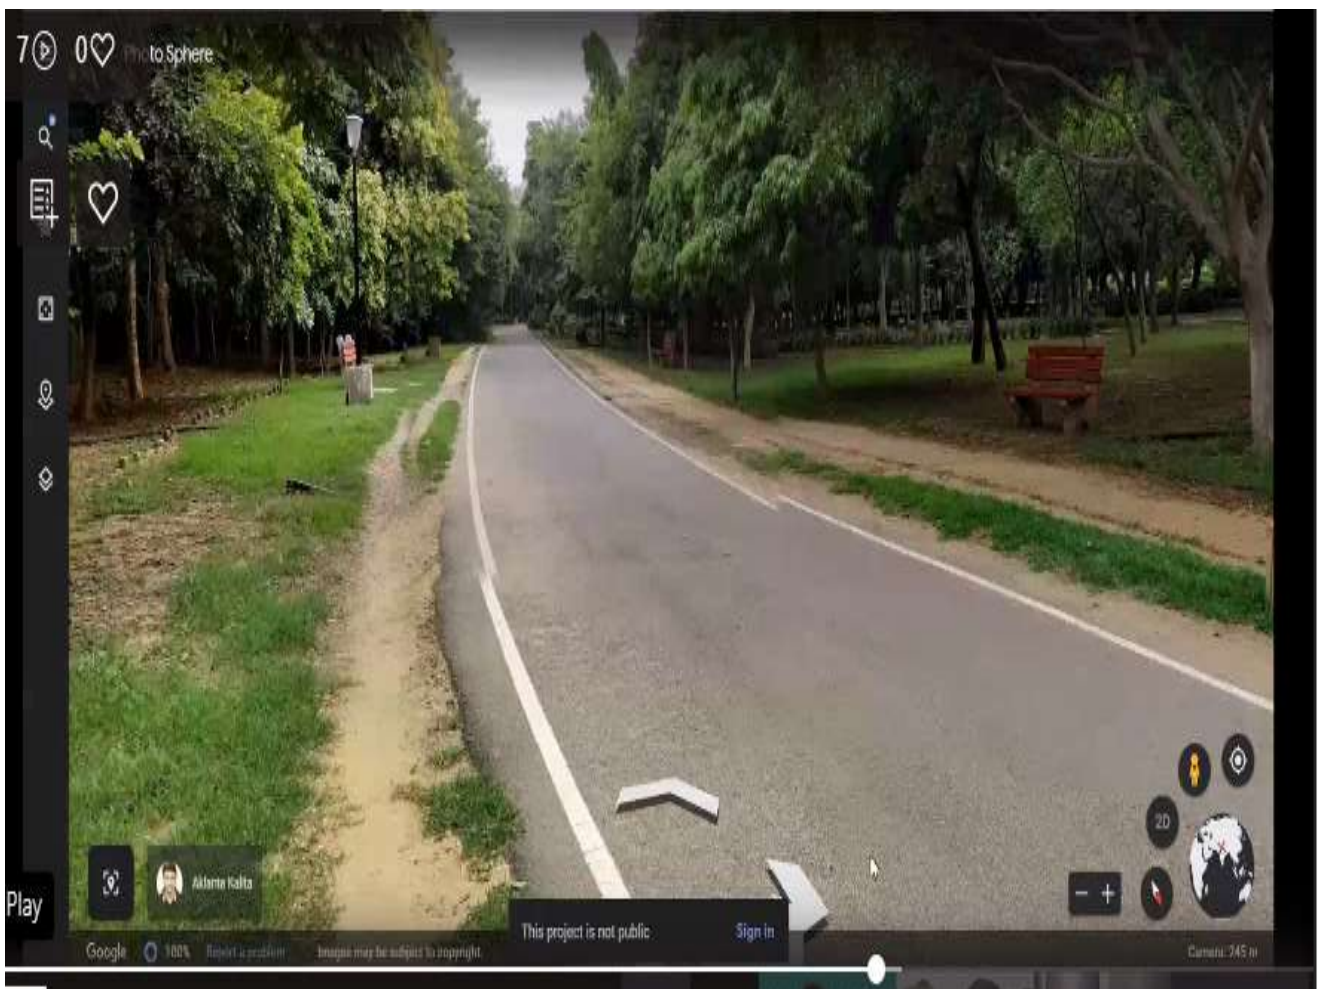

BIODIVERSITY IS THE KEY

SO, WE CAN ALL LIVE IN GLEE!!

The Department of Science at RVS organized a virtual tour to explore Tau Devi Lal Biodiversity Park Delhi for the Grade 5 students on Monday 21 Sep 2020. Students were not only excited but also enthusiastic to share their views on biodiversity. They explored the park and were very curious to learn the names of the flora and fauna shown. They also inferred that biodiversity is soul for life and each life is important to it.

It was a great source of motivation for the students to attend the virtual tour and learn about the degradation and revival of a degraded ecosystem. They were sensitized towards nature appreciation and conservation. The nature walk through the park has encouraged qualities of leadership, exploration and nature observation among the students.

Meeting in "General"

Activity Time

DO SS WB, Q(b) on page no.- 5 and 6.

In the map, show where the trees and bushes were and write their names. Write the names of the animals where you found them.
