

Nursery & KG

Eco Club Activity – SDG Goal 14 – Life Below Water

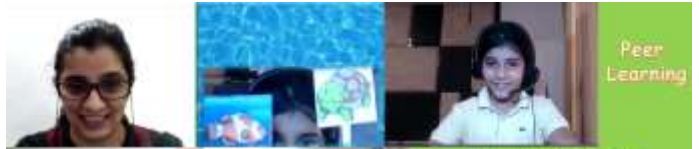

Date of Event : 22.09.2020

The Junior Environment Committee of RVS led by its President, Ms. Aavya Sharma of grade V along with the Junior Environment club member, Ms. Kyra Arora from grade IV took a wonderful initiative to sensitize our little learners from Nursery & Kindergarten about the SDG Goal 14 , "Life Below Water". Both Aavya and Kyra presented a beautiful story through puppets to our youngest lot of the school and appraised them about the water pollution and its effects on the life under water. As a follow up activity, the little ones made beautiful craft showcasing the cleaner oceans with happy fish all around. The day ended with a pledge from our Eco Warriors to save water and keep our water bodies clean by not littering them because every drop counts. Have a look!

BADGE MAKING

Peer Learning

Awareness about 'Water Pollution & its effects' through a Puppet Story by our Environment Club Member: **Kyra Arora** from Grade 4

Freddie the fish - water pollution
