INTRODUCTION OF EDUTEN MATHEMATICS LEARNING PROGRAMME

Dear Parents (Grades V, VI and VIII),

Greetings!

We at RVS always endeavor to provide our students with learning experiences that are engaging as well as challenging at the same time. Keeping this in mind, we are introducing a Mathematics online learning programme- Eduten.

Eduten Playground is based on Finnish pedagogy which makes Mathematics learning & teaching more effective, fun and engaging. It comes with ready-made weekly Mathematics exercise programs for ages 6 to 15 years. Each weekly program includes hundreds of pedagogically high-quality tasks for students to build and improve their skills. Eduten Playground's learning impact is a carefully crafted learning environment that leverages gamification, differentiation, easy goal setting and many other methods. The end result is that students want to work more to improve their skills.

Kindly visit the link given below to get an insight into the Eduten programme -

To access your ward's ID and password for Eduten, please login to ERP-Homework section. Students need to login to playground.eduten.com and attempt the exercises assigned.

Looking forward to your support as always.

Warm Regards,
Team RVS
