

Video Editing Workshop

“An **editor** is successful when the audience enjoys the story and forgets about the juxtapositions of the shots.”

RVS had organised a Video Editing workshop for Grades VI- XI to make them familiar about the basic functionalities of Video Editing. This is a student led initiative by Digital Media Club member, Anant Madhok of Grade 9, who spread his knowledge among others and acquainted other students with the Video Editing software “Shotcut”. Students learnt about basic combining of videos to video collage and green screen effect. Students enjoyed the workshop and it was indeed a learning experience.

Shotcut

Video Editor, Screen Capture, Video Conferencing, Video Conferencing, Video Conferencing

This slide features a central illustration of video production equipment including a camera, a computer monitor displaying a software interface, a clapperboard, a microphone, and a film reel. The background is a light blue and white bokeh pattern. The Shotcut logo is on the left, and the text 'Free Open Source Cross platform' is on the right in a cursive font. The Edge Valley University crest is in the top right corner. The bottom of the slide shows a meeting interface with a grid of 15 participant icons and four names: Video Editor, Screen Capture, Video Conferencing, and Video Conferencing.
