16th DEC 2021

FACEBOOK CBSE COLLABORATION

Dear Parents (PRE NUR – GRADE XII),

Greetings!

As we are aware that Meta (formerly Facebook) is expanding its partnership with the Central Board of Secondary Education (CBSE) to provide a curriculum on digital safety and online well-being and augmented reality (AR) for over ten million students and one million educators in the country over the next three years. Additionally, in line with the government's vision of universalising education, Meta and CBSE will democratise the high school curriculum by allowing students access to quality educational content online through modules which would be made available on CBSE's website.

We feel proud to share with you that our school is selected as a pilot to showcase CBSE - Facebook collaboration for STEM learning. They have released the official video of the shoot that was done in the school campus. We would like you to watch and share the same among your groups. Please find below the link: - <https://youtu.be/vQiNEdOmDh0>

Complete two-hour video is available in the link below: - <https://www.facebook.com/events/408972381014515/>

Looking forward for your contribution in spreading the news around as it's a huge platform for our school to implement AR in education and prepare our kids for the future.

'VIVA RIDGEVALLEY'

Warm Regards
Ms. Nidhi Tewari
Principal
