NATIONAL SCIENCE DAY CELEBRATIONS AT RVS

Dear Parents,

Greetings!

National Science Day is celebrated in India to mark the discovery of the Raman effect by Indian Physicist Sir C. V. Raman on 28 February 1928.

Today at Ridge Valley School, National Science Day was celebrated with great enthusiasm where the students of grades III - V demonstrated various interesting experiments and projects on campus in front the principal, teachers and our young learners from Grades I and II.

This event was a great platform for students to create awareness of Science and Technology and spread a notable message about the importance of science used in our daily lives. The event was a showcase of integrated STEM education as “an effort to combine some or all of the four disciplines of science, technology, engineering, and mathematics into one, making connections between the subjects and real-world problems”.

Please find below the link of the videos with the experiments performed by our students:-

Happy National Science Day!

Warm Regards

Ms. Nidhi Tewari

Principal
